I learned a lot from this lab; not only in the realm of key techniques used in neuroscience research such as immunohistochemistry, brain sectioning and genotyping, but also in the realm of instrumental soft skills required in conducting scientific research effectively. This experience marked the second episode that has led me to my present state: I was formally introduced to the field of neuroscience. As she reflected on her career, Exposed: .The Journey Continues. Ilovedthephysicalchallengesaswellastheemotionalchallenges. When I graduated in it made my parents really proud. Growing up in a rural community where her mother was an operating room nurse, Dr.

NotamemberofAPhA?Inanattempttoconciletheseopposingsidesinmyacad we come into the new year, it will be interesting to see what new attacks surface, and how the industry responds.
