Atherosclerosis occurs over a lifetime and is influenced by numerous factors, including excessive dietary fat, smoking, diabetessedentary lifestyle, and genetic factors. This makes absolute quantification accuracy dependent on the imaging task. These findings, in line with the lower diagnostic performance among patients with extensive calcification, suggest that even with the development of novel technologies such as DE, diffuse calcification remains a limitation of the technique. OralAnticoagulationTherapy. Translational Approach to Heart Failure. Michele Gulizia. Fig 2. ISBNRadiotracers should target processes relevant to disease, which in atherosclerosis are e.
