Most research in political science is based on a naturalist ontology of the social and does not rely on participant observation; the work of Przeworski and his collaborators on the relationship between economic development and the survival of political regimes is exemplary. May Learn how and when to remove this template message. This often gives the perception of trying to answer the "why" and "how come" questions of human communication. Thomask. User-contributed reviews Add a review and share your thoughts with other readers. In local and state politics, representatives rarely have the chance to examine opinions among their constituents through public-opinion polls. Third, ethnography holds out the promise of epistemological innovation.
