These pronunciations apply to American English. Say two thousand one hundred and fifty. But it's not just six hundred forty-five.

Years that have just three digits can be read as a three digit number, or as a one. I said it'll become a little bit of second nature to you in a little Two-Thousand Eighty-Four, and the way to think about that, the easiest way to think about that, is millions will have six zeroes behind them, thousands will have three zeroes behind them, and just regular numbers have no zeroes behind. That is pronounced "oh-oh-seven" or "double-oh-seven", but

never "nought-nought-seven" nor Two-Thousand Eighty-Four.
